

ANDERSON GREENWOOD H5 MINIATURE HAND VALVE

A miniature isolation valve with an interchangeable hard or soft seat for pressures to 6000 psig (414 barg)

FEATURES

- Packing below threads (O-ring bonnet) prevents lubricant washout, thread corrosion, process contamination and eliminates galling.
- Easily adjustable packing decreases replacement downtime and increases valve life.
- Safety back seating prevents stem blowout or removal during operation and provides a metal-to-metal secondary stem seal while in the fully open position.
- ENC plated 316 SS prevents galling or freezing of stem threads.
- Rolled stem, bonnet and male NPT threads provide additional strength.
- Mirror stem finish in the packing area enables smooth operation and extends packing life.
- One-piece handle design prevents loss due to vibration or during maintenance.
- Soft or metal seat for bubble-tight shutoff is field-replaceable for easy maintenance.
- Extended valve life: damaged soft seat can be removed, leaving a metal seated valve.

GENERAL APPLICATION

The H5 mini valves facilitate safe, compact and economical installations and are excellent for straight isolation applications.

NOTE

1. CS is zinc chromate plated to prevent corrosion.
2. Tee handle is SS; round handle is CS.
3. SG (Sour Gas) meets the requirements of NACE MR0175/ISO 15156 (for chloride conditions < 50 mg/l [ppm]) and NACE MR0103.
4. PEEK available.
5. PCTFE (Polychlorotrifluoroethylene) is the exact equivalent of Kel-F[®].
6. SG3 (Sour Gas) meets the requirements of NACE MR0175/ISO 15156 (for chloride conditions > 50 mg/l [ppm]).

BONNET ASSEMBLY OPTIONS

The H5 features the mini-valve bonnet assembly, with a compact design and a one-piece rotating stem which is 'V' tipped with a shoulder for use as a metal or soft seated valve. The stem threads are rolled and lubricated to prevent galling and reduce operating torque.

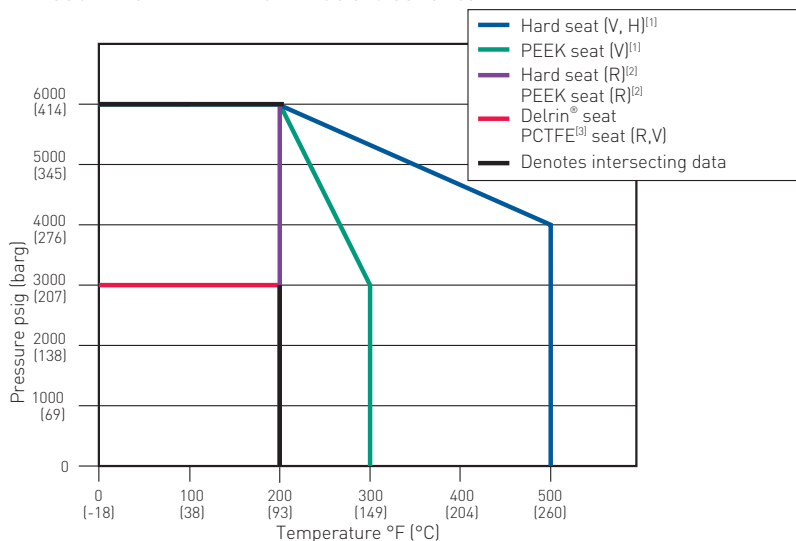

The mini-valve bonnet comes in three designs:

- An adjustable PTFE stem packed bonnet which is suitable for panel mounting via external bonnet threads.
- O-ring bonnet assemblies which use a FKM O-ring seal below the stem thread.
- A graphite-packed bonnet suitable for temperatures of up to 1000°F (538°C) which is available for SS valves only.

OPTIONAL SOFT SEAT^[2]

OPTIONAL PHENOLIC HANDLES^[2]

OPTIONAL GRAFOIL[®] PACKED BONNET

Phenolic handles are available in 1 inch (25 mm) diameter. Colors available are green, red, and black. Phenolic handles facilitate repeatable flow control, as well as enhancing the appearance of panels, sample cylinders and other associated products requiring premium performance throttling and/or isolation valves.

Maximum open dimension of any H5 with Phenolic handles is calculated by adding 0.4 inch (10.2 mm) to the 'A' reference dimension for PTFE stem seal on page 2.

NOTE

1. Available with PTFE packed bonnet.
2. Available on all H5 products.
