

## ANDERSON GREENWOOD MP1/MP2 STATIC PRESSURE MANIFOLDS

Block and bleed manifold for static pressure measurement devices. Single or dual outlet for local indication for static pressure to 6000 psig (414 barg)

### FEATURES

- Cost savings of 20-30% when manifolding instruments by eliminating several parts used in conventional methods of 'piping up'.
- Compact design requires minimum space for operation and installation.
- Fewer leak points reduce leakage by having fewer parts to assemble.
- Free-swivelling ball end stem design ensures bubble-tight valve closure without seat galling.
- Reduced piping costs by mounting two instruments on the same manifold and pipe stand.
- Immediate installation with AGCO Mount as the manifold, steam block, bracket and all associated piping can be installed without the instrument at the time of plant construction.
- Secure mounting provided by the AGCO Mount. Instrument piping stability is enhanced when directly supported by the pipe stand through the manifold.
- All block valve threading is isolated. Packing is below stem threads, body-to-bonnet seal is below the threads minimizing process fluid corrosion.
- Reduced chance of instrument damage. With the AGCO Mount, the instrument can be warehoused safely until final 'loop' checkout.

### GENERAL APPLICATION

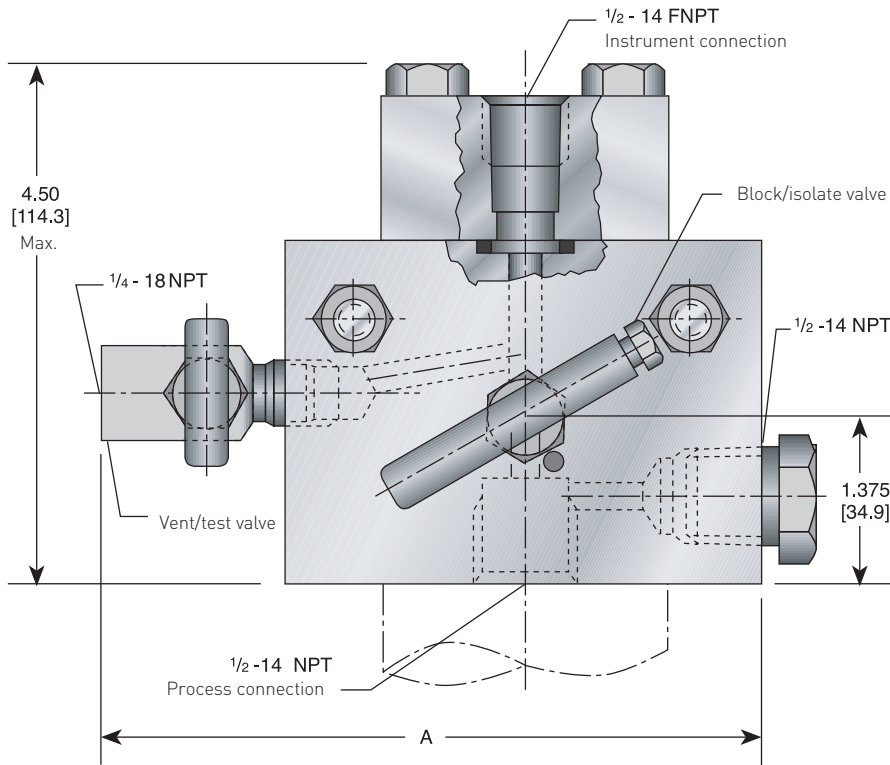

MP1 is a two-valve manifold for single instrument applications, such as block and bleed, test and calibration and instrument zeroing. MP2 is designed to mount two different pressure instruments simultaneously from a single pressure source.

### TECHNICAL DATA

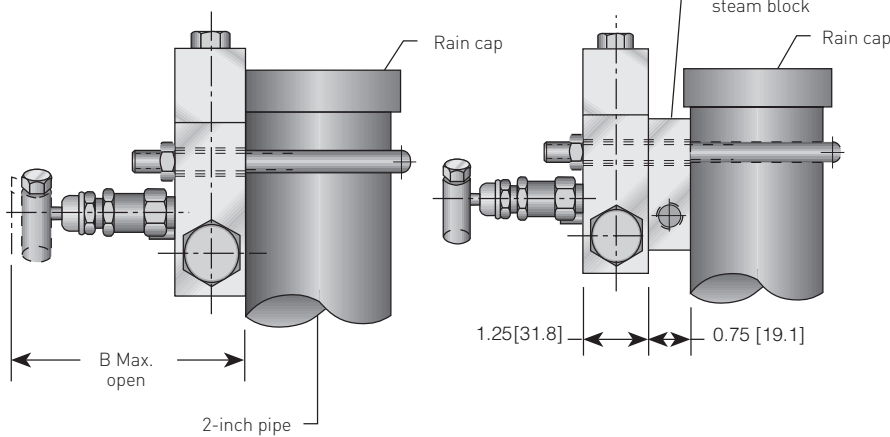

Materials:	CS, SS, Monel
Seats:	Metal
Connections:	
Instrument:	½" (15mm) NPT
Process:	½" (15mm) NPT
Pressure (max.):	6000 psig (414 barg)
Temperature (max.):	1000°F (538°C)

MP1 DIMENSIONS, INCHES (mm)

MP1 Pressure mount

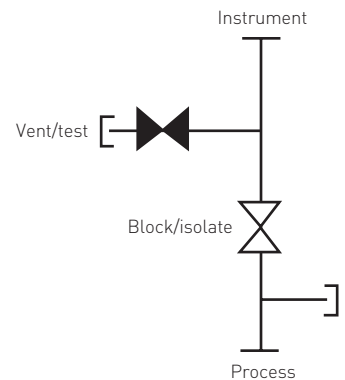

Close-couple Futbol male outlet (option FB1)

## DIMENSIONS

Packing	A	B
PTFE	5.62 [142.7]	3.85 [97.8]
GRAFOIL®/Low emissions graphite	8.20 [208.3]	4.50 [114.3]

## NOTES

1. Pressure seal between union connectors and manifold body is FKM O-ring for PTFE packed valves, GRAFOIL® for GRAFOIL® packed valves.
2. Approximate valve weight: 6.0 lb (2.72 kg).  
0.187-inch (4.8 mm) diameter orifice.  
Valve C<sub>v</sub> 0.52 maximum.

## MP2 DIMENSIONS, INCHES (mm)

MP2 dual pressure mount

## DIMENSIONS, INCHES (mm)

Packing	A	B
PTFE	9.81 (105.7)	3.85 (97.8)
GRAFOIL®/Low emissions graphite	13.98 (355.1)	4.50 (114.3)

## NOTES

1. Pressure seal between union connectors and manifold body is FKM O-ring for PTFE packed valves, GRAFOIL® for GRAFOIL® packed valves.
2. Approximate valve weight:  
10.0 lb (4.54 kg).  
0.187-inch (4.8 mm) diameter orifice.  
Valve C, 0.52 maximum.

Close-couple Futbol male outlet (option FB1)

## PRODUCT OVERVIEW

Both the MP1 and MP2 serve as manifold and mount in one unit. The MP2 has dual block and bleed valves, each operating independently of the other utilizing a single input. The block valves are used to isolate the pressure devices from the process. During normal operation the block valves are open. The static pressure line is connected to the manifold with a 1/2" (15mm) FNPT connection.

## BONNET ASSEMBLIES

The MP1 and MP2 feature metal-seated bonnet assemblies which have a rotating stem with free swivel ball-type seat for long service life. The stem threads are rolled and lubricated to prevent galling and reduce operating torque. The stem seal is a patented PTFE packing gland which is adjustable in service. A protective dust cap is fitted to contain stem lubricant and prevent the influx of contaminants. The specially hardened ball seat is ideal for both gas and liquid service. All bonnets are assembled with a bonnet locking pin to prevent accidental removal while in service.

### NOTES

- CS parts are zinc chromate plated to prevent corrosion.
- SG (Sour Gas) meets the requirements of NACE MR0175/ISO 15156 (for chloride conditions ≤ 50 mg/l (ppm)) and NACE MR0103-2005.
- PTFE packed bleed valve body is 10L18 steel.
- Stem is Monel<sup>®</sup> 400 for hot packed bonnets.
- Minimum temperature for 316SS PTFE and Grafoil packed valves: -70°F (-57°C).
